The Mino is a new speech amplifier that helps you hear better in most everyday situations, whether you wear a hearing aid or just suffer the occasional hearing difficulty.

Sound with CD quality
The Mino uses similar digital technology as modern CD/DVD players and delivers crystal clear speech, free from background noise.

Pocket size and super light
The Mino is as small as a modern cellphone and weighs just 2½ oz. So the Mino can be kept discreetly in your pocket without weighing you down.

Discover Mino
The Mino is a new speech amplifier that helps you hear better in most everyday situations, whether you wear a hearing aid or just suffer the occasional hearing difficulty.

Sound with CD-quality
The Mino uses similar digital technology as modern CD/DVD players and delivers crystal clear speech, free from background noise.

Pocket size and super light
The Mino is as small as a modern cellphone and weighs just 2½ oz. So the Mino can be kept discreetly in your pocket without weighing you down.

Hearing solutions for everyday life
For the past 20 years, Bellman & Symfon of Sweden has worked to improve quality of life for people with hearing impairments. Our team of acoustic engineers, process engineers, and sound experts employ state-of-art digital signal processing technology to deliver hearing solutions.

Single touch action
The Mino is intuitive to use. All functions are accessed with the simple press of a button and there are no complicated menus to navigate.

Long lasting power
The Mino uses a rechargeable lithium-ion battery, just like a modern cellphone. So you never need to worry about buying new batteries.

Zoom the sound
Mino has both an omni- and a unidirectional microphone (zoom). With the zoom microphone, you can ‘point’ to the person talking, reducing any background noise.

Bring Mino to the movies
The Mino is equipped with a telecoil. The telecoil picks up sound in venues fitted with hearing loop systems, such as theaters, churches, and concert halls.

Customize your Mino
If you’d like to tailor your solution, we offer a number of accessories, ranging from advanced hearing accessories to advanced listening accessories. It’s your decision.

Discover the easy way to hear

Are these situations familiar?
- At home. Does your partner often need to speak up to get her point across?
- With friends. Do you have trouble following the conversation when you are out with friends?
- In theaters. Do you avoid going to the movies and concerts?
- In stores. Do you have trouble understanding what the clerk says when out shopping?
- Watching TV. Do you miss words when you watch TV at normal volume?
- With hearing aid. Do you feel that your hearing aid doesn’t fully help in some situations?

Mino
Professional communicator

Enjoy music and TV
With the Mino, you can enjoy music and TV at any volume without disturbing others. Always with full hi-fi quality.

Boost your hearing aid
Connect a neck loop, and the Mino further amplifies speech, and acts as an additional volume and tone control for your hearing aid.

MicroSet™
A discreet way to better hearing.

Copy music and TV
With the Mino, you can enjoy music and TV at any volume without disturbing others. Always with full hi-fi quality.

Trouble hearing people in noisy environments? Change to the zoom microphone to reduce background noise and focus on the conversation.

At home

Listen at the volume of your choice without others having to raise their voices. Simply place the Mino near the other person and worry no more.

The Mino effectively isolates speech while removing disturbing background sounds. The result is crystal clear speech with no noise. We offer a number of accessories for the Mino. Non-hearing aid users can, for example, choose to listen using headphones, MicroSet™ earphones or stetoclips.

With friends

Do you avoid movie theaters and concerts? Many public venues, such as theaters, concert halls, and churches, are fitted with hearing loops. Sound from the loudspeakers in such venues is converted into an electromagnetic field that the Mino picks up via its built-in telecoil. The Mino’s telecoil always delivers perfect sound, whether it’s placed in your pocket or on a table. Look for a T symbol sign next time you visit your favorite movie theater.

In theaters

The MicroSet™ is a unique accessory specially developed for such times. It includes a small lapel microphone that you simply attach to your clothing and a discreet earphone that you pop in your ear. The lapel microphone is unidirectional (zoom) and reduces background noise in the store, so you can talk with the clerk uninhibited.

In stores

When you’re shopping down town, it’s handy to keep the Mino in a pocket so that both your hands are free.

The MicroSet™ is a unique accessory specially developed for such times. It includes a small lapel microphone that you simply attach to your clothing and a discreet earphone that you pop in your ear. The lapel microphone is unidirectional (zoom) and reduces background noise in the store, so you can talk with the clerk uninhibited.

With the Mino, there’s no reason to turn up the TV volume to hear better. Use a cable kit to connect the Mino to the TV and you can enjoy good TV sound in stereo while sparing your family’s ears. If you want to comment on the show, simply press the Push-to-Listen button on the Mino to lower the volume and join the conversation.

Watching TV

If your hearing aid isn’t quite enough in certain situations, you should try connecting it to your Mino using our discreet neck loop.

The Mino further amplifies the sound and also acts as a receiver for easy adjustment of the volume and treble, as well as microphone selection. You can also connect the Mino to the TV to amplify the TV sound in your hearing aid. Do you travel a lot? Then you can store your Mino and accessories in this protective travel case for the Mino.
